## Skills \_\_\_\_\_

- UML | Merise | React Native | CSS | Bootstrap | JavaScript | JQuery | React | NestJS | PHP | Laravel | Python
- Odoo | Dolibarr | C | C++ | Solidity | Hardhat | EVM | MySQL | PostgreSQL | SQL Server | Docker | Docker-Compose | K8s
- Microservices | ERPs | Full-Stack | OS and Low Level | Blockchain | English, French, Arabic All professional proficiency or above

## Experience \_

#### Software Engineer Odoo Namur, Belgium 06/2021 - Current

- Collaborated closely with clients to identify areas for improvement and implement new features to our software based on their valuable insights using Python, JavaScript, OWL, Odoo Framework and PostgreSQL,
- working on an accounting application, automating complex data processing tasks for the accounting reports, creating proxy server for electronic data exchange with multiple government APIs (different localization).
- refactor outdated code for enhanced functionality and alignment with the new internal framework. Tackle technical debt, optimise performance, and ensure the software's endurance without unnecessary frills.
- Took on a mentorship role, helping onboard new colleagues and supporting their growth within the team, reviewing their progress, and ensuring their integration within the team.

## Full Stack Developer

## WobyWeb Hong Kong

Remote 11/2019 - 06/2021

- Craft and bring to life an e-learning platform that's uniquely designed for our company's using JavaScript, JQuery, PHP, MySQL. software implementation, engineering, testing, and configuring metrics, alarms, monitors, and dashboards.
- Designed and implemented scalable APIs and background workers for managing a SAAS Food delivery application using JavaScript, Node, NestJS, Prisma, Docker, and K8s.
- Led the development part of a social media web and mobile application including Code reviews, load/stress testing, integration using JavaScript, Node, React, React Native, Redux, NestJS, PostgreSQL, and Docker.
- Designed and implemented a modular enterprise resource planning microservice applications, Using the latest technologies UML, JavaScript, React, Tailwind, React Native, PHP, Symphony, and MySQL.
- Crafted bespoke customised modules with specific features to meet our customers' needs to enhance the capabilities of the Dolibarr ERP/CRM using JavaScript, PHP, and MySQL.

### Full Stack Developer, Intern

Studitech

Kenitra, Morocco 03/2019 - 05/2019

Craft and bring to life an e-learning platform that's uniquely designed for our company's using JavaScript, JQuery, PHP, MySQL.

## Education

#### Software Engineer Diploma 42 School Benguerir, Morocco 10/2019 - 09/2021

Major in Computer Science

## Specialized Technician Diploma

**OFFPT** 

Kenitra, Morocco 09/2017 - 07/2019

• Major in IT Development.

### Projects .

- Web Server: Develop a high-performance web server in C++, adhering to RFC internet standards and inspired by Nginx.
- Ping Pong: Creates an online ping pong platform with chat, gifts system, crons and the ability to watch any game using NestJS.
- K8s Cluster: This project aims to create a robust and scalable cluster using Kubernetes and Docker that will deploy a collection of apps.
- Shell: building a custom shell, similar to Bash using C.

## Volunteering \_

- COVID19: During the pandemic, Morocco's Education Ministry ensured continuous learning via remote platforms, fostering seamless communication. I played a key role in providing technical assistance for this shift within the technical team division.
- Google Hashcode: On Feb 22, 2020, I organised Google Hash Code at 1337 School. I guided participants, explained the competition, and ensured a supportive environment for optimal performance

### Awards

- Bronze Award: Won 4th prize for WorldSkills National Competition in IT Software Solutions for business. (06/2019 @ Casablanca)
- Honours Student: Honours Student of the Specialized Technician Degree In IT Development. (07/2019)
